PRODUCT CATALOGUE · 06

Cocuy Tea

Cocuy tea, often written cou-cui, is green tea that has been roasted: dry green tea leaves are heated in a rotary roaster until they turn dark and porous. The open leaf structure takes up flower aroma easily, which makes cocuy the main base for Indonesian jasmine tea. We supply it from Takokak (South Cianjur) and Pangalengan green tea, West Java, for jasmine tea makers, packers and tea brands, from 1 kg retail to a full container.

Illustrative photo. Request a sample to see the actual lot.

DAILY REFERENCE PRICE

USD 6.80/kg

IDR 125,000/kg · as of 2026-11-27

Indicative reference price per kg for retail and wholesale, following the Indonesian market price on the date shown. Final FOB/CIF price by written quotation.

Scan for full details and today's price

SPECIFICATION

Plant	Camellia sinensis
Base tea	Green tea from Takokak (South Cianjur) and Pangalengan (South Bandung), West Java
Manufacture	Green tea roasted in a rotary roaster, roast level to order
Appearance	Twisted and broken leaf, dark brown to near black, porous
Moisture	Confirmed for every lot (base green tea max. 8%, SNI 3945:2016)
Packing	Retail from 1 kg; wholesale 25 or 40 kg paper sack
HS code	0902.20 (green tea, packings over 3 kg)
Export terms	FOB or CIF

WHY ROAST GREEN TEA?

Porous	Roasting opens the leaf so it takes up jasmine aroma strongly during scenting.
Dark colour	The leaf is dark from roasting, not from oxidation as in black tea.
Ready to scent	Mixed with fresh jasmine flowers, then dried again into jasmine tea.

SUITED FOR

- Jasmine and scented tea makers
- Tea packers and blenders
- Loose-leaf and tea-bag jasmine tea brands
